

SEWP V

Solutions for Enterprise-Wide Procurement

The NASA SEWP (Solutions for Enterprise-Wide Procurement) GWAC (Government-Wide Acquisition Contract) provides the latest in Information Technology (IT) products and services for all Federal Agencies and their approved contractors. The statutory authority allowing usage of the SEWP contract, by the entire Federal Government, is NASA's designation as an Executive Agent by OMB based on the Information Technology Management Reform Act (ITMRA) of 1996, now the Clinger Cohen Act.

NASA SEWP V is comprised of over 140 pre-competed Prime Contract Holders. Fair Opportunity: FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding \$10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the CO and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP QRT tool will automatically include the Contract Holders within a selected Group or based on a suggested source.

Through NASA SEWP, agencies have access to a wide range of commercial advanced technology. This technology includes: Desktops, laptops and servers, Network equipment, Storage systems, Security tools, tablets, and Cloud based services. Also available on SEWP contracts; installation, maintenance and other professional integration services related to in-scope technology products. Access to these solutions are available to all Federal Agencies.

Key Benefits of NASA SEWP GWAC:

- Only takes 24 hours to add new products. Can be as few as two days to turn around RFQ responses.
- SEWP surcharge for all orders is 0.34% – no cap.
- Used by all Federal departments and agencies and authorized support services for contractors.
